DV M TT 255 (FM): Modular combined lightning current and surge arrester for TT and TN-S systems ("3+1" circuit)

- **Prewired combined spark-gap-based lightning current and surge arrester, consisting of a base part and plug-in protection modules**
- **Maximum system availability due to RADAX Flow follow current limitation**
- **No tripping of 20 A gL/gG fuses up to 50 kA<sub>rms</sub> short-circuit currents**
- **Lightning current discharge capacity: 100 kA (10/350 μs)**
- **Allows for protection of terminal equipment**
- **Fault indication by red mark in the inspection window**
- **Easy exchange of protection modules by module locking system with releasing button**
- **Tested for vibration- and shock-proofness acc. to EN 60068-2**
