

Information Technology Systems Combination Surge Arrester

CLASS 3

Surgeguard TV

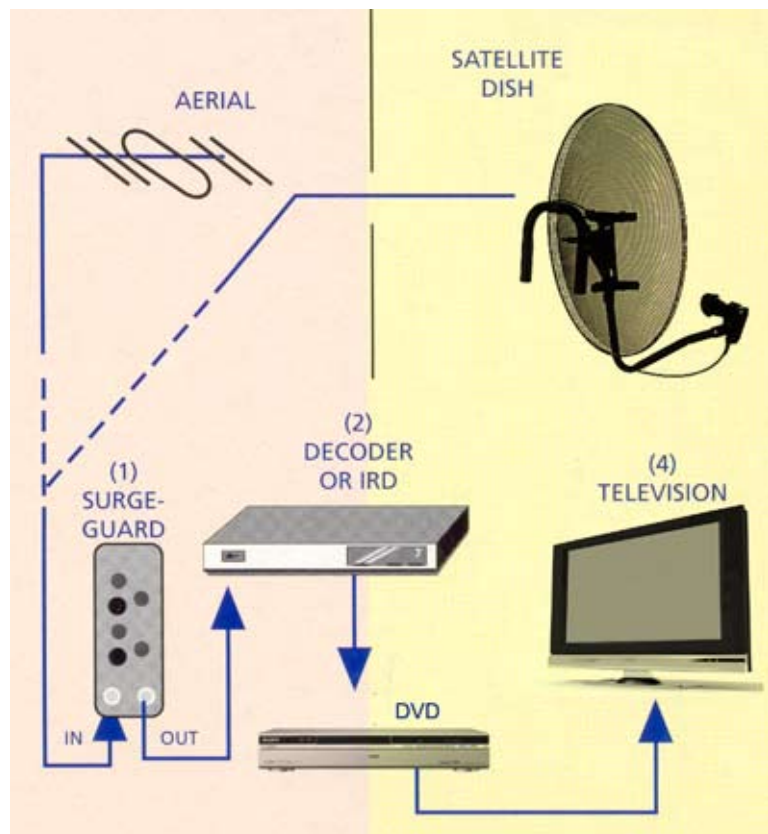

Combined 6.5kA (8/20) power and 10kA (8/20) antenna protector for television sets.

- Designed to be installed where TV cables enter the house
- Designed to withstand surges of 5 kA on the power and 10 kA on the antenna and satellite cables
- 2 x 15 Amp protected power sockets
- 1,5 m power cable

Please note: For these Class 3 devices to function correctly in terms of SANS 10142-1:2006, additional Class 2 surge arrestors must be installed (upstream).

Installation
